

Abdullah Nadeem

Personal Portfolio Website

Overview

This website is a personal portfolio for **Abdullah Nadeem**, designed to present his professional profile, technical skills, and selected projects. It also provides an easy way for visitors to contact him and connect via social platforms. The site is crafted with a focus on clean code, accessibility, smooth animations, and a consistent, modern visual theme.

Unique Features

- **Animated Hero Section:**
Eye-catching introduction with animated text and background effects.
- **About Section:**
Detailed background, skills, and philosophy, with animated headings and a profile image.
- **Projects Showcase:**
Responsive project cards with images, descriptions, and hover animations.
- **Contact Section:**
Stylish contact form with animated feedback and a custom mail icon, plus scroll-triggered animations.
- **Sticky Header & Mobile Navigation:**
Always-accessible navigation with a hamburger menu for mobile, including animated open/close transitions.
- **Animated Footer:**
Themed footer with social links, animated text, and copyright.
- **Scroll-triggered Animations:**
Sections animate into view as you scroll, using Intersection Observer for performance.

- **Fully Responsive Design:**
Optimized for all devices from large desktops to small mobile screens.

Technologies Used

- **HTML5** – Semantic markup for structure and accessibility
- **CSS3** – Flexbox, Grid, gradients, and keyframe animations
- **JavaScript (ES6+)** – Interactivity, animations, and logic
- **Font Awesome** – Icons used in navigation, contact, and footer
- **Google Fonts** – Custom typography using Dancing Script and Noto Sans
- **Intersection Observer API** – Efficient scroll-triggered animations

Design & Theme

- **Color Scheme:**
Dark background (#23272f, #2f3542) with vibrant aqua and blue accents (#00ffcc, #3de2ff)
- **Typography:**
 - *Dancing Script* for headings – adds personality
 - *Noto Sans* for body text – clean and readable
- **Visual Style:**
Glassmorphism effects with soft box shadows and rounded containers
Subtle background gradients for sections and headings
- **Responsive Layout:**
Built using Flexbox and CSS Grid with media queries for all screen sizes
Hamburger menu and slide-in mobile navigation
